Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/486,797	WEGENER, HARALD	
	Examiner	Art Unit	
	Twyler M. Lamb	2622	
-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --			
Period for Reply			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.			
<ul style="list-style-type: none"> - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 			
Status			
1) <input checked="" type="checkbox"/> Responsive to communication(s) filed on <u>08 January 2003</u> .			
2a) <input type="checkbox"/> This action is FINAL. 2b) <input checked="" type="checkbox"/> This action is non-final.			
3) <input type="checkbox"/> Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.			
Disposition of Claims			
4) <input checked="" type="checkbox"/> Claim(s) <u>1-18, 20 and 21</u> is/are pending in the application.			
4a) Of the above claim(s) _____ is/are withdrawn from consideration.			
5) <input checked="" type="checkbox"/> Claim(s) <u>15-18</u> is/are allowed.			
6) <input checked="" type="checkbox"/> Claim(s) <u>1-9</u> is/are rejected.			
7) <input checked="" type="checkbox"/> Claim(s) <u>10-14, 20 and 21</u> is/are objected to.			
8) <input type="checkbox"/> Claim(s) _____ are subject to restriction and/or election requirement.			
Application Papers			
9) <input type="checkbox"/> The specification is objected to by the Examiner.			
10) <input type="checkbox"/> The drawing(s) filed on _____ is/are: a) <input type="checkbox"/> accepted or b) <input type="checkbox"/> objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).			
11) <input type="checkbox"/> The proposed drawing correction filed on _____ is: a) <input type="checkbox"/> approved b) <input type="checkbox"/> disapproved by the Examiner. If approved, corrected drawings are required in reply to this Office action.			
12) <input type="checkbox"/> The oath or declaration is objected to by the Examiner.			
Priority under 35 U.S.C. §§ 119 and 120			
13) <input type="checkbox"/> Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) <input type="checkbox"/> All b) <input type="checkbox"/> Some * c) <input type="checkbox"/> None of: 1. <input type="checkbox"/> Certified copies of the priority documents have been received. 2. <input type="checkbox"/> Certified copies of the priority documents have been received in Application No. _____. 3. <input type="checkbox"/> Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.			
14) <input type="checkbox"/> Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application). a) <input type="checkbox"/> The translation of the foreign language provisional application has been received.			
15) <input type="checkbox"/> Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.			
Attachment(s)			
1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)		4) <input type="checkbox"/> Interview Summary (PTO-413) Paper No(s). _____ .	
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)		5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)	
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ .		6) <input type="checkbox"/> Other: _____ .	

DETAILED ACTION

Notice to Applicant (s)

1. This action is responsive to the following communications: amendment B filed on 1/8/03.
2. This application has been reconsidered. Claims 1-18 and 20-21 are pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Dreyer et al. (Dreyer) (US 6,246,993).

With regard to claim 1, Dreyer discloses a method for electronic archiving (which reads on storing the completed pages on a storage medium such as an optical disc or other storage device) (col 12, lines 49-54) of a data stream output by a computer in a computer-specific data format (col 8, lines 47-58) that contains at least one of graphic information and text information (col 12, lines 1-8), comprising the steps of: distinguishing form data from variable data in the data stream (col 19, lines 50-53; col 37, lines 55-57) based on pixels while said data is in a printer data format (col 9, lines 30-40); and differently processing the data types (which reads on processing the master pages and the variable pages) (col 8, lines 27-34).

With regard to claim 2, Dreyer also discloses further comprising the step of: allocating references to the form data to the variable data (which reads on assigning file names identifying the master page file and variable page file) (col 19, lines 50-53).

With regard to claim 4, Dreyer also discloses wherein said step of distinguishing between form data and variable data ensues in the printer-specific data format (which reads on converting into bitmaps usable on one or more demand printers or any other type of display device) (col 8, lines 27-34).

With regard to claim 5, Dreyer also discloses further comprising the step of: seeking form indicators for recognizing form data in the data stream (which reads on assigning file names identifying the master page file and variable page file) (col 19, lines 50-56).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dreyer et al. (Dreyer) (US 6,246,993) in view of Tanaka (US 4,944,614).

Dreyer differs from claim 3 in that he does not clearly teach comprising the steps of: storing a form data sheet of identical form data only once within a predetermined data group storing all allocated variable data of all datasets of the data group.

Art Unit: 2622

Tanaka discloses a form overlay type document printing system that includes the steps of: storing a form data sheet of identical form data only once within a predetermined data group (col 2, lines 35-66) and storing all allocated variable data of all datasets of the data group (col 2, line 63 col 3, line 5).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer to include the steps of: storing a form data sheet of identical form data only once within a predetermined data group and storing all allocated variable data of all datasets of the data group as taught by Tanaka. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer by the teaching of Tanaka to ensure that the variable data will be changed upon completion of printing while maintaining the form data as is as taught by Tanaka in col 3, lines 6-12.

With regard to claim 6, Dreyer differs from claim 6 in that he does not specifically teach the steps of: investigating data of the data stream first in groups for form data, and allocating between the variable data and the form data only given repeated occurrence of form data.

Tanaka discloses a form overlay type document printing system that includes the steps of: investigating data of the data stream in groups for form data (col 2, lines 35-44), and allocating between the variable data and the form data (col 2, lines 35-44) only given repeated occurrence of form data (col 2, lines 45-49).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer to include further comprising the steps

of: investigating data of the data stream in groups for form data, and allocating between the variable data and the form data only given repeated occurrence of form data as taught by Tanaka. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer by the teaching of Tanaka to ensure that the variable data will be changed upon completion of printing while maintaining the form data as is as taught by Tanaka in col 3, lines 6-12.

With regard to claim 7, Dreyer differs from claim 7 in that he does not clearly teach the step of using overlay information as form indicators.

Tanaka discloses a form overlay type document printing system that includes further comprising the step of: using overlay information as form indicators (which reads on replacing the variable data while the form data remains as is) (col 3, lines 7-17).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer to include the step of: using overlay information as form indicators as taught by Tanaka. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer by the teaching of Tanaka to ensure that the variable data will be changed upon completion of printing while maintaining the form data as is as taught by Tanaka in col 3, lines 6-12.

With regard to claim 8, Dreyer differs from claim 8 in that he does not clearly teach the steps of: storing a form dataset after a first occurrence within the predetermined data group of the data stream; and only marking data as s form dataset,

converting the data into a form bitmap and allocating the data to an appertaining variable dataset after a repeated occurrence.

Tanaka discloses a form overlay type document printing system that includes the steps of: storing a form dataset after a first occurrence within the predetermined data group of the data stream (col 2, lines 45-49); only marking data as s form dataset (which reads on discriminating form data) (col 2, lines 35-41); and converting the data into a form bitmap and allocating the data to an appertaining variable dataset after a repeated occurrence (col 3, lines 6-17).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer to include further comprising the steps of: storing a form dataset after a first occurrence within the predetermined data group of the data stream; and only marking data as s form dataset, converting the data into a form bitmap and allocating the data to an appertaining variable dataset after a repeated occurrence as taught by Tanaka. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer by the teaching of Tanaka to ensure that the variable data will be changed upon completion of printing while maintaining the form data as is as taught by Tanaka in col 3, lines 6-12.

With regard to claim 9, Dreyer differs from claim 9 in that he does not clearly teach further comprising the steps of: with a work sequence, implementing at least one of printing and archiving.

Tanaka discloses a form overlay type document printing system that includes further comprising the steps of: with a work sequence, implementing at least one of

printing and archiving (which reads on maintaining the form data as is after printing) (col 3, lines 6-17).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer to include further comprising the steps of: with a work sequence, implementing at least one of printing and archiving as taught by Tanaka. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Dreyer by the teaching of Tanaka to ensure that the variable data will be changed upon completion of printing while maintaining the form data as is as taught by Tanaka in col 3, lines 6-12.

Allowable Subject Matter

5. Claims 15-18 are allowed.
6. Claims 10-14 and 20-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1-18 and 20-21 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2622

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Twyler Lamb whose telephone number is 703 - 305-8823. The examiner can normally be reached on M-TH (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L Coles can be reached on 703-305-4712. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-6036 for regular communications and 703-872-9314 for After Final communications.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, DC 20231

or faxed to:

(703) 872-9314

(for informal or draft communications, such as proposed amendments to be discussed at an interview; please label such communications "PROPOSED" or "DRAFT")

or hand-carried to:

Crystal Park Two
